Hysan Included in FTSE4Good Index Series

Hysan Development Company Limited is pleased to announce that it has become a constituent member of the FTSE4Good Global Index, one of the best known indices for socially responsible investment.

This index is regularly used as a tool by investors to identify companies that meet globally recognised socially responsible standards in the areas of environmental protection, social and stakeholder relations, human and labour rights, and countering bribery. One key objective of the Index is to contribute to the development of responsible business practice around the world.

“We are delighted that Hysan is now a constituent member of such a prestigious international index,” said Mr. Peter T.C. Lee, Chairman of Hysan Development. “The inclusion recognises our efforts to strive to be both a successful and responsible business.” “As a member of the Index, we will continue to maintain high ethical and corporate governance standards, address environmental issues, contribute to our communities, and communicate well with our stakeholders.”

From the Corporate Responsibility perspective, Hysan strives to integrate its contributions to society into its everyday business activities, including efforts towards environmental sustainability and health and safety. Apart from these contributions made through core activities, Hysan also provides financial support, as well as expertise and manpower, towards community investment projects.

Hysan is the first Hong Kong based company to be added to FTSE4Good Global Index since September 2005.

Hysan Development is a leading property investment, management and development company in Hong Kong with a major portfolio in high-quality office, retail and residential properties. It is the largest commercial landlord in the prime office/retail Causeway Bay district.
