**Hysan recognised as “Innovation Movers – Business Transformer”**

Hysan Development has been recognized as an “Innovation Movers – Business Transformer” by HKSTP – Hong Kong Science and Technology Parks Corporation. HKSTP highlights Hong Kong’s “Innovation Movers” to acknowledge corporate support for innovation growth, adoption and impact in the city.

Adoption of business technology innovation is a Hysan priority. At the early onset of COVID-19, Hysan was among the first landlords in Hong Kong to upgrade health and safety protocols, and provided flexible solutions to help tenants. Among the most prominent was the provision of more than 1000 top-level air purifiers, locally designed by Aurabeat Technology Limited, to all Food and Beverages tenants, as well as some service-based tenants. The decision was made weeks before the issuance of a stringent government mandate on air purifiers and restaurant ventilation.

In supporting local technology developers, Hysan also partnered with Rice Robotics as their first customer to use a Rice robot for air quality and security checking purposes. Hysan was also an early adopter of the now-popular Germagic hand sanitizing products, another Hong Kong success story.

“We are very pleased to receive this recognition from the Hong Kong Science and Technology Parks Corporation. Hysan will continue to source technological solutions, with an emphasis on locally-developed ones, to make our community a better place for all,” said Mr. Ricky Lui, Hysan’s Chief Operating Officer.

Mr. Ravel Lai, Hysan’s General Manager of Business Technology, receives on stage the “Innovation Movers – Business Transformer” recognition on behalf of Hysan.

Hysan became one of the 「Innovation Movers – Business Transformer」 corporates awarded by the Hong Kong Science and Technology Parks Corporation.
